9   Application Serial No. 09/913,686

REMARKS

In view of the Examiner's statements in the first paragraph on page 2 of the Office Action dated November 3, 2005 regarding the nature of the payload data,

5   Applicant has amended each independent claim to define the first section <u>and</u> the second section of the payload data as having audio data, video data, a combination of audio data and video data, text data, or binary data forming an executable program. This amendment is supported by page 7, lines 22 to 26 of the "Final Version of PCT/EP 99/09981."

10

In the amended claims, it is clearly stated that the second unencrypted section of the payload data is different from a public key. Instead, this second section includes audio data, video data, a combination of audio data and video data, text data, or binary data forming an executable program.

15

To the contrary, in Van Oorschot, the whole message is encrypted, and the public key is not encrypted, but the public key is very different from audio data, video data, a combination of audio data and video data, text data, or binary data forming an executable program.

20

Thus, claim 1 is new and inventive over Van Oorschot.

Should the Examiner deem it helpful, he should contact Applicant's attorney, Michael A. Glenn, at (650) 474-8400.

25

Respectfully Submitted,

Michael A. Glenn
